Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US 2002/0086793 to LaBarge et al.

The instantly claimed invention involves a catalyst and method for treating exhaust gases using such catalyst. The composition contains copper oxide, ZSM-5 and zeolite beta, and at least one oxide of magnesium and calcium.

LaBarge et al. disclose compositions containing mixtures of zeolites such as zeolite beta and ZSM-5, on which copper and alkaline earth metals are deposited prior to calcination, which disclosure anticipates the instantly claimed composition. The compositions are all taught to have utility for treating exhaust gases. The amounts of the catalytic components appear to be embraced by the reference disclosures of effective components. See particularly paragraphs [0016]-[0027].

Response to Arguments

Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

The information set forth in the Declaration under 35 USC 132 is also not convincing evidence of unexpected results. The closest prior art of record is the LaBarge et al. documents, which does disclose mixtures of zeolites. Accordingly, a declaration comparing mixtures to single zeolites is not a comparison to the closest prior art and is not probative.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
